

Bronx have been a supplier of Tension Levelling and Inspection Lines for more than 30 years with installations worldwide.

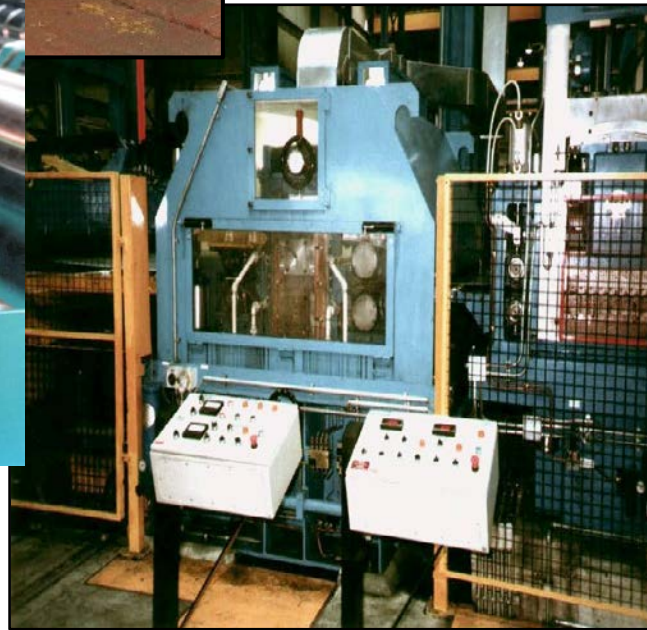

Bronx supply lines to Tension Level Aluminium or Steel up to 1850 mm strip width, aluminium 0.2 to 3.0 mm thick and steel 0.2 to 2.3 mm thick with line speeds up to 300 mpm

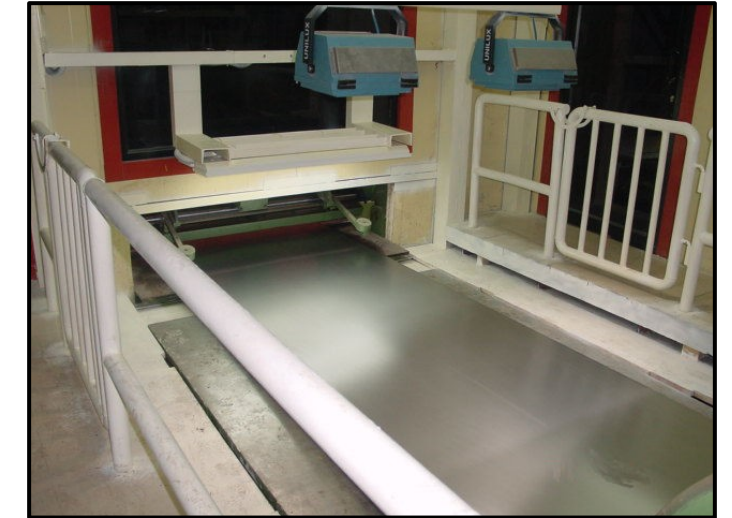

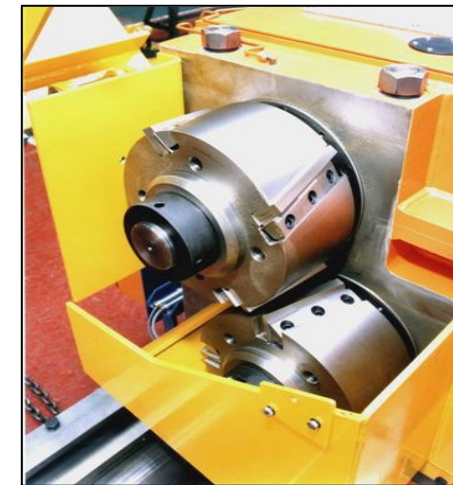

Pre-clean or full cleaning section along with stitching or welding of coil ends.

Bronx offer 3 or 4 station design of Tension Levelling Machines with 6 high roll configuration for surface sensitive materials such as aluminium, galvanised steel and auto-body grade steels.

Edge trimming before and or after levelling complete with scrap balling or chopping.

Inspection can be horizontal or vertical with visual, stroboscopic or full digital camera systems.
