

HIGH STRENGTH PRECISION LEVELLER FROM **BRONX ENGINEERING**

Bronx Engineering are delivering a precision leveller for processing high strength materials for use in the Automotive Industry.

Bronx have developed this new machine to meet market demand for steel grades with yield stress up to 1280MPa at thicknesses between 0.5 and 2.0mm.

Bronx have established a reputation over the last 60 years for building strong reliable machines setting the standard worldwide.

This new machine is an example of Bronx's commitment to continuous development of their technology to meet the advancement in materials used in the strip metals industry.

The new machine has been designed for significantly higher loads and with an increased range of adjustment necessary to process all thicknesses of this high strength material.
