- Predictive maintenance.
- Live support.
- All documents in one place in one hand with easy access and structure.
iBronx4.0 – is a software product developed by The Bronx Group in accordance with ideas of industry 4.0

**Philosophy:**

1. To bring equipment maintenance to the next level.
2. To make the equipment able to self diagnose.
3. To create an easy interface with equipment which is friendly, easy and mobile.
4. To optimize the connection and planning between the production and maintenance.
**iBronx4.0** – gives you further abilities:

1. Planned maintenance is organized into a Smart Schedule based on the equipment performance. System will notify you in advance so you will be able even to make sure all spare parts, tools and materials are ready.

2. If you need to order any part or materials, you can quickly and easy send a request to us.

3. All equipment maintenance is supported with manuals, drawings and even step-by-step photos so each person with appropriate background can easily do it.

4. Planned tasks can be created manually as well if it is necessary, so it gives even more flexibility.

5. Manager can create a personal account per each engineer, fitter, operator to track and simplify actions.
iBronx4.0 – get it from us and start your business upgrade:
